

Mapping Graded Care Profile 2 (GCP2) Grades on to Surrey's Effective Family Resilience Model

The following table shows how the grades from GCP2 translate on to Surrey's Effective Family Resilience Model and the subsequent responses that should be considered for each grade. Please note:

- The RAG rating below correlates to the GCP2 grade descriptors, not the RAG ratings within the Surrey Effective Support Windscreen.
- How you make referrals to other services, does not change as a result of the following.
- If there are concerns about domestic abuse, parental mental health or substance misuse, please consider whether an adult safeguarding referral to Surrey Multi-Agency Safeguarding Hub is required.

GCP2 Grade	Description	Response	Effective Family Resilience Model
1 & 2	<u>No Neglectful Parenting:</u> Consistent good quality parenting where the child's needs are always paramount or priority	Normal universal access to services. Further assessment as and when indicated	UNIVERSAL SERVICES
3	<u>Mild Neglect:</u> Failure to provide care in one or two areas of basic needs, but most of the time a good quality of care is provided across the majority of the domains	Usually does not warrant a Request for Support but might require a single agency targeted short term intervention or potentially Early Help Assessment until resolved. May need to escalate concerns if there is no evidence of the care improving over a 6-month period.	UNIVERSAL SERVICES/ EARLY HELP EARLY HELP
4	<u>Moderate Neglect:</u> Failure to provide good quality care across a number of the child's needs most of the time. Can occur when less intrusive measures such as single agency interventions have failed, or	Requires a multi-agency coordinated intervention, potentially with Early Help Assessment or at a Child in Need level for further support where needed. All cases need formal monitoring for referral to children's services if the care does not improve. If there's no evidence of improvement over 6-month period, if associated with substantial risk factors (Mental Health,	TARGETED HELP / SPECIALIST SPECIALIST

	when some moderate harm to the child is likely to occur.	Domestic Abuse, Drug and Alcohol misuse) or where care is grade 4 in most areas, a Request for Support should be made. May also be managed at Child Protection level when parents aren't engaging, where there are concerns of disguised compliance, where concerns have existed for a substantial period of time or where there has been a pattern of fluctuating care but no sustained change made.	
5	<u>Severe Neglect:</u> Failure to provide good quality care across a number of the child's needs all of the time. Occurs when severe or long-term harm has been or is likely to be caused to the child, or where the parents/carers are unwilling/unable to engage in work.	Where care is grade 5 in more than one area, a Request for Support form should be submitted. If the child is subject to child protection arrangements, then the GCP2 should be repeated for each review or as agreed. If these concerns persist across a period of time, or care in the majority/all areas is grade 5, then discussion about a legal option may be required. The GCP2 can be used as part of the evidence for legal planning.	TARGETED HELP / SPECIALIST SPECIALIST
